Message from the Principal

**Dr. Rama
Principal**

Congratulations to the members of Chemistry department for publishing the sixth issue of their annual departmental magazine “Equilibrium”. Students and faculty of the department are creatively enhancing this platform every year. Efforts invested in the production and publication of this issue must have been an enriching experience for the students involved. I hope the magazine enjoys a wide readership. Keep up the good work.

Message from Teacher-in-charge

Dr. Pratibha Tiwari

My dear 3rd year students, despite some hard tasks, sadness and grief that you have encountered in the course of your studies in the college, at the end of it all you completed this part of journey with great achievement and beautiful memories. I and my fellow colleagues wish to thank you for your zeal which you have demonstrated towards your studies and among yourselves during this pandemic situation. At this point I want to implore my dear outgoing students to always see yourself as good ambassador of this college. Be kind and good to people you meet on your way up. Think big thoughts and be optimistic in whatever you are doing. On behalf of Department, I bid you farewell and wish you best of luck in your days ahead. God bless you all.

Message from Convener

Dr. Chetna Gupta

This year is going to be a very different year! It has touched almost every aspect of our lives. But the things have to move on and so is our little efforts to make this editorial memorable one for our third-year students. I feel very fortunate to have got the creative, intelligent, enthusiastic and hard-working team and am so pleased to have been able to guide and assist them in all through the way. I like to extend my warm wishes to all my colleagues who have been so supportive throughout the year.

A message for my students:

You have got all the potential and now you have to find the right platform for you to express your talent and make your dreams come true. Good Luck!

Parting Words

President - Aadya Jaipuria

The Chemistry Department has been like a second home to me, and I'm grateful for everything it has given me. The respect and love of the juniors, experiences of our seniors, and the guidance received from the teachers helped me become a better version of myself. These three years of college have been no less than an adventure. Being the president of this department was a great honour, and it's only fair to say that I wouldn't have made it without the immense support I received, and hard work put in by every member of this quintessential team. All the knowledge and confidence I gained from this experience is truly invaluable, and I wouldn't trade it for the world. The Chemical Society truly out-did itself this year, and I couldn't be more proud of what we achieved with the National Seminar. Hansraj will always have a special place in my heart, and I'll never forget what it gave me. With a heavy heart and a faint smile, I'd finally like to say, Aadya Out!

Vice Presidents

Devanshu Mishra

Part of the journey is the end , I literally didn't saw that coming in such an unexpected and erroneous manner. Being the part of Rasayanatva helped me to learn so much –from learning how to manage the events to conducting seminars and fest and then eagerly waiting for farewell since first year :-p..As the Dumbledore once said- " Happiness can be found, even in the darkest of times, if one only remembers to turn on the light". Yes, these are time of uncertainties but we are in this together and thus I wish you all might be doing well and I hope you all a good and a prosperous year ahead!

Aman Bansal

The journey at Hansraj which started 3 years ago was very enriching and beautiful one though the last part was not as expected but this is not the end as we always say "picture abhi baaki h mere dost". In these 3 years I never realized that the life at Hansraj is becoming bored or tired, it was always joyful and for that credit goes to my friends who were always there. As a part of society I always get to learn something new at its every step. The dedication and efforts of the entire team led it to a successful year of the society and its events helps enhancing the standards of chemistry department at Hansraj College. I would like to thanks all the teachers who always supports us and their teaching make the subject easy going and interesting one and special thanks to Chetna ma'am whose dedication, whether it was towards her teaching or society, always inspires us. She always stand there for us. Working under her guidance taught us a lot. At last I wish good luck to all my batchmates and juniors for their bright future.

Editors' Note

We are very delighted to present to you the sixth edition of our annual magazine 'EQUILIBRIUM'. By its means we have tried to commemorate the past events and happenings of the Chemistry Department of Hansraj College throughout the year 2019-20.

However this edition is particularly unique. It is an open letter of love and appreciation to all our seniors. We wanted to give you something positive to carry with you as you take your next big step in life.

It was a giant task to make this special as a lasting record. How do we compensate a year without farewell dance and graduation day? How do we honor a batch deprived of most senior year milestones? How do you publish a yearbook when half of the year went missing? We gave our very best efforts dear seniors. Hope it meets your expectations and upholds the high legacy of the past editions. We are grateful and indebted towards the teachers and students for their invaluable support.

Lastly, we wish our seniors all the best for all their future endeavours. This is not a goodbye, dear seniors, it is a thank you.

Regards
Tushar Sharma Banstola & Prateek Jain

Rasayanatva 2019-20

Departmental society hai , yaha kuch nahi hota !

Usually yes , but when it comes to Chemistry there are elements which happen to be suddenly more stable than their counterparts not because they are exceptions but there are factors and reasons which make it more stable than everyone else. One such journey was Chemistry Council 2019 - 20 under the stable factor i.e. our inspiring convener Dr. Chetna Gupta!

The bloom of the session happens with the arrival of the freshers and making them feel comfortable with their seniors and " not so easy " life ahead was the primordial task we had in our ends. From our side we conducted regular sessions with the new comers making them abreast of what Hansraj will feel like , how those long hours of lab will initially feel depressing but later feel home and how they are to develop themselves by taking part in various societies of talent and interest. To welcome them officially and in a grand manner , the council put in hard efforts to arrange the official freshers party. Flavoured by food , savored by some amazing talent on stage , relished by the funny antics of their seniors and the dramatic end to the show with some fun dance and memorable photographs , we made sure they are part of the family.

Our targets were simple but our motive was focused. We vowed as a society to replenish the minds of the students with some intriguing sessions by renowned professors from IIT and other parts of the country who spoke on unearthed and unknown aspects in field of Chemistry and their careers. Not only the students found those sessions important but it also brought a much needed spark and interest to learn this subject with more passion and commitment. Some of the topics included sessions on Applied Chemistry , Nano Technology Based Chemistry , Breast Cancer and Forensic Chemistry. The journey involved a lot of rough turfs where we lacked cooperation among ourselves , wherein we received back lashes and bad days but as I told you we had someone inspiring us everytime and mam managed to knit us all close bringing about those regrouping sessions and meetings and asking us the updates of our proposed works.

At a point where climate change is the inevitable end to mankind, it is highly important to be aware about what is happening and what is going to be the outcome of such a defining issue. Third world countries are emerging major consumers of resources and should ensure the procedures are not causing any harm to the environment. Being a third world country ourselves, it is highly significant that we carry out our development keeping in mind the greenness and sustainability of the processes. The need of the hour is to have scientists dedicating their research towards the betterment of our environment and incorporate an interdisciplinary approach to their work. The council under the leadership of our convener decided to organize a national conference on environment and sustainability to engage in discussion with some of the bright minds of the country working for the same.

The work was immense and it demanded cooperation from every member of the society. Nevertheless we were ready for it. We divided ourselves into teams , engaged the juniors and the second year students and began work at herculean speed. All the teams beginning from technical to editorial matched upto each other providing the PR team to broadcast messages far and wide allowing enough people to know about our initiative. Some of us lost sleep having to manage studies and work at the same time. I remember there were days when we reached home late as 9 after having left early morning for college completing video shoots , finalizing sponsorship deals and looking for the green products that were to be distributed to the participants.

As the days came closer to our D Day we kept facing a lot of obstacles. There were widespread disturbance in parts of Delhi causing miscommunication between our key members , even though we released posters and videos each day for a month yet there weren't much registrations and there was regular non cooperation from union with the final date of our seminar. But nothing could stop us. We were always ready with a Plan B unleashing a huge number of registrations on our final day , we made up for the people stuck in their homes and with our motivated selves no other person or union could disturb the dates nor our registrations. We inched closer to the final day of our conference finishing our last minute touches and finalizing all the preparations for the guests to arrive. Removing the clouds to a bright day , we held ESTW 2020 with a huge number of participants from colleges of Delhi University , universities of neighborhood states and some distinguished alumni from parts of the country. All our speakers made us enthralled throughout the day through their work for a greener world and thereby enriching everyone of us to leave the auditorium with a new vision of change. Besides preparing for the conference , we kept preparing for the departmental fest as well. Under the able leadership of our council members , the juniors brought up beautiful creative work using biodegradable materials which was again a step towards a bigger change under the aegis of " less polluted environment ". The departmental fest took place on the next day of our conference and there we were without a bit of energy dropped and presenting a colourful show of decorations , mind boggling games , mouth watering food and the awaited DJ. The colourful photographs and the memories of so many people enjoying our hard work over days became a memorable sight from the far end.

For some of us Rasayanatva was our second home , of course you might feel little dramatic about feeling so much for a departmental society but for few of us it was much more than that. The things that we were praised for at the end of the year didn't happen so easily for there were some people who worked effortlessly behind the scenes giving up on all other work , fun sessions and get togethers. They sweated for the society in the college and spent endless hours back in their hostels even for the post that was to be released the next day for promotion and making sure all the accounts were kept in check. Even when we were with our closed ones , we kept attending to the endless query calls for the conference without getting irritated or agitated. Because somewhere we were passionate with what we wanted to do , somewhere we were determined to show everyone how capable we were despite being only " a departmental society " inspite of all the fun and memes that were made on us.

" Haan yaha kuch nahi hota , but iss bar humne bhot kuch karke dikhaya "

No doubt we failed at some of our endeavours but we ensure you to see them completed and reach newer heights in the coming session promising to infuse the same skill set of determination in the newer batch to carry this legacy ahead and ensuring that they work towards a greener world of Chemistry.

" I hope you will stand up to what we have believed in "

-Ankush Paul
General Secretary

Fresher's 2019

The society organised the fresher's party on 3rd September 2019 in the auditorium to welcome the juniors to a new life ahead. The event was made further enjoyable by selecting the theme of the event as 'Bollywood'. The event began with Aadya giving a warm welcome to everyone and then inviting the anchors to further proceed with the event. It was followed by lightning of lamp by professors of the chemistry department and taking the blessings from the almighty. The fresher's day was clubbed with the celebration of teacher's day as well. Dr. Pratibha, HOD of the department presented her ideas for the same.

Dr. Chetna, the Convenor of the society welcomed the students and wished them with best wishes for the life ahead. The first performance was given by Nishita who stole the stage by her gracious moves in Kathak. Addition of games in the event made it more fun frolic. Several games were played including balloon game, guessing the song from its instrumental music, catching the phrase; performing the hook step of the song, boys in sari and performing a ramp walk and tie game. All of this engrossed the audience and ensured full-fledged participation of the first years.

Pragya made the environment romantic by reciting her self-written poetry. Abhijeet Mehta further recited a shayari in the remembrance of his best friend that helped everyone to embrace their friendship. The stage witnessed the talents of students when Tanishka and Baibhav gave energetic performances with their groups with a complete Bollywood mashup. Sweta, Ratnesh-Sachin and Vaibhav entertained everyone with their melodies. It was an icing on the cake moment when Yashit performed a hilarious act by mimicking Amitabh Bachchan, Shahrukh Khan and Sunil Shetty.

Baibhav and Bhawna set the stage on fire with their duet performance. The event came to an end with a ramp walk on the stage. The announcement of well-dressed and best performer led everyone to keep their fingers crossed. Bhawna was declared the best performer. Yaseer and Shaifali were awarded as the best well dressed. Yashit and Tanishka were crowned as the mister and miss fresher. The event was finally concluded with the students dancing on the beats at the DJ. Everyone too left with memorable imprints on their mind.

-Palak Yadav (I year)

NATIONAL SEMINAR ON ENVIRONMENT AND SUSTAINABILITY IN THE THIRD WORLD

A one day national seminar was conducted by the Department of Chemistry on Environment and Sustainability in the Third World on 28th February , 2020.The seminar featured renowned scientists and short talks on outstanding abstracts. The conference brought together students, research scholars and faculty members on a same platform to discuss about the biggest problem in today's world- Environment and Climate Change. The seminar was carried out in a sustainable manner with minimum waste generation in every step. The seminar was graced by the presence of renowned scientists like:

Prof. R.K. Sharma

(Department of Chemistry, Delhi University)

Topic of the talk- Green Chemistry: Designing Chemistry for Human Health & Environment

Prof. C. R. Babu

(CEMDE, Department of Environmental Studies, University of Delhi)

Topic of the talk- Ecological Restoration of Degraded Ecosystems & Sustainable Development

Shri D. RaghuNandan

(Director, Centre for Technology & Development and Delhi Science Forum)

Topic of the talk- Climate Crisis: Status & Challenges for India

Prof. Krishan Kumar

(School of Environmental Sciences, Jawaharlal Nehru University)

Topic of the talk- Spatial Gradient of Carbon Monoxide over the Indo-Gangetic Plain Region

Dr. Livleen K Kahlon

(Associate Director, Environment Education and Awareness, TERI)

Topic of the talk- Building Sustainability Leadership Amongst our Youth Cadre : A need of the hour

Apart from lectures by them, there was a workshop on Smart Agriculture by Mr. Farad and Mr. Bhaskar from TERI School of Advanced Sciences. The speakers addressed the problem of Climate Change and Environment Degradation and showed novel methods through which they can be tackled ranging from introducing greener methods in synthesis to ecological restoration.

Oral Presentations were also conducted where students and research scholars presented short talks on various topics and their research. The day long seminar was an eye opener for many and addressed a lot of issues. It also motivated the young and future scientists to adopt an environmental friendly approach for the goodwill of our planet Earth. Hope this event is a stepping stone towards something bigger in near future and we hope to come back with a bigger event very soon in lines of environment and sustainability.

Fest season is the most awaiting and chilling part of everyone's college life specially when you are talking about Delhi University fests. Every college student knows the significance of February and March as it accounts for a break from daily routine of college. The department fest is something that encapsulates and accentuates the spirit of competitiveness amongst departments while bringing all of us together under the same level of good vibes. Every department put in their best efforts to make their fest entertaining and exciting and hope for maximum crowd at their place. Confluence, the annual fest of Hansraj College allows different departments to hold their fest and made their event a huge success. Rasayanatva, The Chemical Society of Hansraj College had it's annual fest Chemotsav on 29th February 2020 in LP. There is no better chance to socialize and make bonds with your department students during the preparation of the event. The preparation started just 10-15 days before the fest and it allowed to discover some hidden talents. Duties were given accordingly where ones heart lies. There was no junior senior barriers seen among the students. Everyone was working so comfortably and enthusiastically to make their department rise. Students provide a forum for the free and fruitful exchange of ideas and good vibes too. It was absolutely unbelievable to see the creativity of the minds who all came here by scoring good in academics.

The technical team tried their best for the maximum involvement of crowd. A lot of posters and videos were shared by the team and were also posted on Instagram handle. Ten days prior to the event all the Instagram stories were flooded with the news of this event. The involvement of first years was maximum as it was their first time while the seniors guided them in each and every phase. The department conducted a seminar on Environment and Sustainability in the Third World just one day before Chemotsav, accordingly the theme for the event was based on recycling. Minimum amount of paper and plastics was used to ensure the maximum benefit of the environment yet the decoration outshined. Papers and plastic were replaced by newspaper thereby providing a better alternative to decoration and many objects like strings, flowers made out of newspaper were equally shining in the Ip area as any other would have. On the day of the event, there was a perfect coordination seen among the students during the assembling of the creative work and gaming zones in Staff Canteen. Einstein depicting a great scientist and Instagram which has taken a major part in the life were the two photo booths crowded by the visitors every moment throughout the fest. Just within an hour that silent place converted into a blissful atmosphere. Of the games, one was WeBinge to see your binge watching knowledge and pictionary to check how fast you can communicate with your friends without actually speaking. Maaro Mujhey Maaro was there to check your aiming skills and Pippete the gems out to check your level of concentration. It becomes a whole new experience when teachers are also involved in the games. Chemotsav was the right fest for the one who craves for food. Everyone was busy while doing something. Finally the dance floor was left open. A good mix of music was played to boost everyone. Right from London Thumakda to Dil Dhadakne Do everyone danced their hearts out. The wonderful day of fun and frolics came to an end with the clicking of photographs.

The event showed that no stones were left unturned by the Chemistry Department of Hansraj College and made the event a huge success.

-Tanishka Sharma (I year)

Guest Lectures

'SIGNIFICANCE OF FORENSIC CHEMISTRY'

The society organized a guest lecture on 'SIGNIFICANCE OF FORENSIC CHEMISTRY' on 20 August, 2019 by Dr. G.S. Sodhi , Associate Professor in the Department of Chemistry, SGTB Khalsa College, Delhi University. The exalting demonstration of the application of chemistry in crime investigation intrigued every student. He apprised his innovations and research projects performed by him and his team of hard working students over the years. The lecture was informative , enthralling and surely convinced students to take over the course in the future and work under his guidance.

-Prashansa Mehta (I year)

'Role of Chemistry in Advanced Materials and Nanotechnology'

A guest lecture on the 'Role of Chemistry in Advanced Materials and Nanotechnology' was organized on 6th September 2019 in college premises. The speaker for the lecture was Dr. Ashok K Ganguli, an alumnus of Hansraj College and is presently Professor in Department of Chemistry, Indian Institute of Technology, Delhi. He mentioned Chemistry as the 'backbone' of the advanced materials and nanotechnology. He reflected his profound knowledge on the topic and highlighted how chemistry has always been important in modern technology. The lecture was informative and educative and everybody was enlightened by his in-depth knowledge.

-Prashansa Mehta (I year)

'Breast and Cervical Cancer in India'

The society organized another guest lecture on the topic 'Breast and Cervical Cancer in India' on 3 October 2019. The speaker for the lecture was Dr. Indu Aggarwal, HOD, Preventive Oncology Department, Rajiv Gandhi Cancer Institute and Research Centre. She was accompanied by Dr. VC Saxena, Oncosurgeon, RGCIRC and Mr. Gagandeep, Assistant Manager ,Preventive Oncology Department , RGCIRC.

With October being the Breast Cancer Awareness month, the main motive was to raise awareness among the students regarding the same. The lecture was very informative and significant in making the students come in terms with the otherwise stigmatized ailment.

-Diksha Rana (II year)

Bidding Adieu

Slam book
2020

Nivedita Das

- My Hansraj life in one word- Roller Coaster
- I was so embarrassed when - thankfully escaped from this one ;)
- My friends call me - nibby , Momo
- I will always remember - Chemotsav 2018-2020
- My first crush in clg was - error 404

Devanshu Mishra

- My Hansraj life in one word- Quirky and peculiar
- I was so embarrassed when- Shampa ma'am compared tearing my shirt with the salt splited in the lab.
- My friends call me- devanshu
- I will always remember- the time we spent in canteen, lp and the walks we all use to have during night and unending fun in the pg
- My first crush in clg was- I don't know her name

Surbhi Rao

- My Hansraj life in one word - astonishing.
- I was so embarrassed when shampa mam scolded me in lab for not being regular .
- My friends call me - nothing specific , they just call me by my name
- I will always remember - my very first friend from college Bhavya Babuta . Bhavya you've been my constant support , thank you for being there . I love you the most
- My first crush in clg was - a second year junior in chemistry Hons .

Adya Jaipuria

- My Hansraj life in one word - memorable
- I am way too embarrassing to be embarrassed of any one thing haha
- My friends call me aaadhaaaa
- I will always remember relaxing in Lab 5 weighing room
- My first crush in college was nobody

Yashasvi

- My Hansraj life in one word- "mohabbat"
- I was so embarrassed when..... "Ambika ma'am criticised me for not being able to speak loudly in front of the whole class"
- My friends call me..... "Yashi"
- I will always remember..... 'Planning to bunk the lab and instead of going home sitting and keeping an eye so that no one spoils the bunk."
- My first crush in clg was..... "Vo vaale sir.. i don't know his name..

Vivek

- My Hansraj life in one word- magnificent
- I was so embarrassed when - once I was talking in front of friends in double meaning and I did not even know what I was saying.
- My friends call me- vivu
- I will always remember - friendship and my fav spot(Wendy's and Malka ganj)
- My First crush in clg was - Deepika

Ayush Agarwal

- My Hansraj life in one word- Splendid
- I was so embarrassed when- Being a hosteller I always get late and attend first class 15-20 minutes late and always getting caught on using phone while sitting at the first seat.
- My friends call me- Baniya.
- I will always remember- 4 hours in lab and obviously hostel life .
- My first crush in clg was- Sab kuch sarvjanik krna acha nhi.

Nikki Mittal

- My Hansraj life in one word: Bindaas
- I was so embarrassed when I accidentally spilled water on my clothes and attended the lab in wet clothes.
- My friends call me Nikki.
- I will always remember the unsuccessful class bunks, chilling at LP and everything about NSS.
- My first crush in clg was noone.

Imdad

- My Hansraj life in one word- Pyaar
- I was so embarrassed when I'm NEVER embarrassed
- My friends call me - Baap (coz u know, I M DAD)
- I will always remember - Those HEAVENLY stairs infront of C Block
- My first crush in clg was - that one painfully beautiful vocalist from Swaranjali (ye raaj bhi ussi k saath chali gayi)

Shivani Gupta

- My Hansraj life in one word- Memorable
- I was so embarrassed when -there was not an embarrassing moment
- My friends call me- Hitler, baniya
- I will always remember- LP and the moments we all had there
- My first crush in clg was- I wish I could tell... But I don't want to..

Akanksha Rao

- My Hansraj life in one word- ... Amazing
- I was so embarrassed when.....No such type of moment
- My friends call me.....Akku
- I will always remember..... Hansraj College memory lp area pr friends ke sath masti nd all
- My first crush in clg was.....None

Aman Rana

- My Hansraj life in one word - exciting
- I was most embarrassed when- my parents called me by my nickname in front of my some classmates
- My friends call me - ammo
- I will always remember- the time I time I spent with my friends.
- My first crush in clg- nobody coz I already had someone in my life

Paras Meena

- My Hansraj life in one word- miserable
- I was so embarrassed when- Never embarrassed
- My friends call me- paras/monty
- I will always remember- 4 hr travelling daily in metro for college
- My first crush in clg was- no one

Anjali Mangla

- My Hansraj life in one word- worth remembering lifetime
- I was so embarrassed when -we used to create mess at lp on every birthday cake cutting, unsuccessful massbunks(though everytime), long discussions on where to go , forgetting everytime where the class is except for B4
- My friends call me...Jugaadu.(mainly because the way i used to do my lab experiments and arrange notes during exams)
- I will always remember..everyday,every person i met and made friends with,every place we visited,everyday long gossip sessions at lp,every little memory in short
- My first crush in clg was... obvio none

Shruti

- My Hansraj life in one word- ... memory
- I was so embarrassed when..... -
- My friends call me....shruti
- I will always remember.....my 2nd year in which we have spent the whole of our day either in canteen or lp but didnt go for any cls especially the physical lecture
- My first crush in clg was.....-

Bhavya Babuta

- My Hansraj life in one word- most colourful life changing experience!
- I was so embarrassed when- teachers used to ask me as to why was I absent(like seriously..I am in college! ..why must I answer?). Also 2hr travel just to discover that lab is cancelled! And awkward silence during viva (one of my favourites though xD)
- My friends call me- always before time (coz yeah I always wait for them)
- I will always remember- all of birthday celebrations at lp, flash, "agla station Vishwavidyalaya hai", all the fire acts performed in lab(endless memories), canteen ka khana (the list is never-ending) and it would be incomplete if I don't mention my friends <3
- My first crush in clg was- hush!hush!hush! "Secret" ;)

Gaurav

- My Hansraj life in one word- ... magnificent
- I was so embarrassed when.....when i want to ask out someone and the guys were cheering up in background.
- My friends call me..... Gauri
- I will always remember.....LP, Friends,vivek pg and flat , first girlfriend
- My first crush in clg was.....Tanya And didi aap bhi intelligence ke mamle mein

Mahendra

- My Hansraj life in one word- ...JABARDAST
- I was so embarrassed when.....PHYSICAL CHEMISTRY CLASSES
- My friends call me.....CHACHA
- I will always remember.....ELECTION CAMPAIGN
- My first crush in clg was.....NOONE

Vipin Saini

- My Hansraj life in one word- Leisured
- I was so embarrassed when-A teacher asked a question related to Chemistry in front of whole class.
- My friends call me- Vipin
- I will always remember - Despite being a hosteler, entering in morning classes after teacher started taking class.
- My first crush in clg was- No one

Komal Mavi

- My Hansraj life in one word- ...super fun
- I was so embarrassed when.....i slipped in bangla sahib due to rain in front of many classmates
- My friends call me.....aafat
- I will always remember.....2nd year when we sat in canteen all day long just not to attend the boring lectures
- My first crush in clg was.....-

Parvesh

- My Hansraj life in one word - Flexible
- I was so embarrassed when - teacher took Attendance
- My friends call me - Bhai
- I will always remember - Midnight
- My first crush in clg was - College Chor gai

Satyam Srivastva

- My Hansraj life in one word- Unexpected
- I was so embarrassed when - I and Asif were bitching about a professor and she was listening to us sitting right beside us
- My friends call me. -Sattu Baby
- I will always remember - Reading the Preamble in protest against the CAA in the college canteen
- My first crush in clg was - Agrima Juneja :'(

Ajit

- My Hansraj life in one word- ... Exciting
- I was so embarrassed when.....when bunk class convert into the class because of some student
- My friends call me.....hawabaz
- I will always remember.....nomination form for president post in college election
- My first crush in clg was.... Don't know

Bhoopendra

- My Hansraj life in one word - .Mixer of some amazing moments and some not good moments, got life lessons from not good part and from amazing part learnt how to live life.
- I was so embarrassed when - None
- My friends call me - Bhoopendra
- I will always remember - Rain dance and friends birthday celebrations.
- My first crush in clg was - I don't know her name.

Shwetank

- My Hansraj life in one word- lazy
- I was so embarrassed when in labs
- My friends call me by fauji
- I will always remember c bloxk steps meetings
- My first crush in clg was – shhh!!

Anand Jain

- My Hansraj life in one word- memories
- I was so embarrassed when I was calling my friend "oye bh***i ke idhar aa" on the stairs and a mam caught m and said "college m gali de rhe ho chlo principal office m"..
- My friends call me Anand
- I will always remember after college parties on pg, shardi m bus m latak kr mukhargee nagar se college aana, mahender bhai ke liye election campaign fir attendance 0.75% kam nikalna.

Epilogue

We have been a part of the society for two years but for the first time in these years we failed miserably at something not because we hadn't done proper planning or preparation but something much powerful forced us to stay back away from each other not allowing us to bid goodbye in a way we always wanted to.

Yet this farewell would be a memorable one because we couldn't hide our emotions behind those photographs and performances , far from each other I guess you all have understood and felt what you actually meant to each other. The pangs of separation might have felt a little more dreadful because you never knew when these golden 3 years passed away.

Life was always supposed to be that uncertain right ? It never actually falls at place by what we planned to do but according to its pre decided path.

I don't know if this farewell will be difficult or impossible to bear , but I know that years down the line you will forget many things but this journey and the end shall be etched in your mind for a long time , if not "forever".

"Life brings tears, smiles, and memories. The tears dry, the smiles fade, but the memories last forever."
